Education

Bachelors of Technology (B.Tech - CSE)Accurate Institute of Management and Technology | Dr. A.P.J. Abdul Kalam Technical University 2023 – 2027

Skills

- **Programming & Core CS:** Java, JavaScript, Python, C, Data Structures & Algorithms, OOP, DBMS , Computer Network , Operating System
- **Frontend Development:** React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
- **Backend & Database:** Node.js, Express.js, REST APIs, MySQL, MongoDB, JWT Authentication
- **Testing & API Tools:** Manual Testing, Functional Testing, Regression Testing, Test Case Design, Postman, Selenium
- **Tools & Methodologies:** Git, GitHub, Agile, Scrum, SDLC

Experience

Cleanhub India Private Limited, Noida - **Software Developer** Apr 2026 – Present

- Building a service-based product from scratch using React.js, Node.js, and Express.js.
- Developed REST APIs, subscription workflows, and automated task scheduling systems.
- Implemented authentication and authorization for secure access and protected routes.
- Designed and integrated responsive frontend modules with backend APIs, ensuring smooth data flow and consistent user experience.
- Performed API testing, debugging, and validation using Postman to improve application reliability.
- Used MongoDB/MySQL, Git/GitHub, and Agile for database management and collaborative development.

Flikt Technology Web Solution, Noida - **Software Developer Intern** Oct2025–Mar2026

- Developed responsive and reusable UI components using React.js and JavaScript.
- Integrated REST APIs and managed frontend–backend data flow for application features.
- Performed debugging, testing, and bug fixes to improve application reliability and usability.
- Used Git/GitHub for version control and collaborated with the development team on feature implementation and deployment.

Projects

PG Finder | React.js, JavaScript, Tailwind CSS, Node.js, Express.js, MongoDB, REST APIs, JWT, Postman, Selenium, Git, GitHub

- Built a responsive PG Finder with PG Owner/Seeker dashboards, listings, filters, enquiries, and role-based access using React.js, Node.js, Express.js, and MongoDB.
- Developed REST APIs, implemented JWT authentication, and tested key workflows using Postman and Selenium.
- Used Git/GitHub & Generative AI for version control, smart recommendations, and user assistance.

YouTube Watch Party | React.js, Node.js, Express.js, WebSockets

- Built a real-time full-stack application enabling synchronized YouTube video streaming across multiple users.
- Implemented WebSocket communication for instant play/pause, seek, and video synchronization.
- Developed room-based session management with unique room IDs and role-based permissions (Host, Moderator, Participant).
- Integrated YouTube IFrame API and server-side authorization for secure playback controls and participant management.

Certifications

Google IT Support Professional Certificate **– DATA TECH ALPHA**
